CORPORATE COMPLIANCE & **LIABILITY MANAGEMENT**

KU Resources is highly qualified in and has successfully completed numerous environmental compliance and liability management issues for industrial and commercial companies. Combining our experience and expertise allows us to offer a wide range of services, customized to our clients' specific needs.

REGULATORY COMPLIANCE

Failure to meet environmental regulations can result in substantial penalties, temporary curtailment of operations or production, and negative public image. With the myriad of environmental record keeping, reporting, permitting, and operational requirements, compliance with the regulations can be perplexing. Our regulatory compliance management services are designed to assist clients through the often complex environmental regulatory system. Our staff of experienced professionals perform regulatory compliance activities on a regular basis and remains up-to-date on environmental regulations to ensure the highest level of quality service.

Our environmental compliance services address issues of loss prevention, due diligence, regulatory change, public image promotion, and budgetary planning support. We develop proactive plans to safeguard our clients by identifying potential issues. Our services include:

- Facility/corporate audits
- Emergency response plans
- Pollution prevention plans
- EPCRA reporting
- Regulatory and management programs
- Environmental permitting
- Training
- Incidental release controls
- Remediation

LIABILITY MANAGEMENT

Environmental liabilities cost hundreds of thousands of dollars in fines, penalties, and corrective actions each year to reputable corporations. Whether you are buying or building a new facility, expanding current operations, or just uncertain about existing regulations, the experts at KU Resources can assist you in identifying these potential liabilities and managing their associated risks. By taking a proactive approach, you could significantly reduce and possibly eliminate unnecessary exposure to costly environmental liabilities. Our seasoned staff have successfully completed numerous liability management projects, including:

- Due diligence assessments
- Risk evaluations
- Brownfield/voluntary corrective action programs
- Waste management
- Compliance monitoring
- Cost recovery programs

We can work independently or as a direct extension of your staff to support acquisitions or expansions, develop management systems, act as a corporate or technical agent, assist in the development of corporate strategies, and provide litigation support.
